

Path Pro shown with optional deflector and plow markers.

The ATV Solution for clearing snow from the leading brand in snow removal.

More than 80 years ago Meyer pioneered what is now the commercial snowplow business in North America. So if you want to push snow with your ATV, go with the leading brand in the snow removal industry. Introducing the Meyer Path Pro™. Teamed with your ATV, the all-steel Path Pro is perfect for clearing snow from sidewalks or other tight areas not suitable for a plow truck.

PERFORMANCE

PATH PRO'S UNIQUE HIGHWAY PLOW DESIGN CLEARS SNOW FASTER AND BETTER.

The Meyer Path Pro is a commercial-grade, full-trip plow available in 50", 60" or 72" widths. The Path Pro's 65° attack angle scrapes the surface more cleanly than standard straight blades. Shop around and you will find there's nothing like it on the market.

SCOOP AND FUNNEL™ DESIGN

The highway-plow inspired flared wings scoop and funnel the snow faster and throw it farther than competitive blades.

The dual flared wing moldboard design, coupled with the 65° attack angle, provides scoop and funnel discharge action.

Patented Self-Angling or Loc-n-Go... The Choice Is Yours

Only the Path Pro comes with automatic self-angling. Self-angling works by sensing which side of the plow is gathering the most snow, then automatically angles the blade in that direction.

If you prefer, you can lock the plow in one of five different positions using the Loc-n-Go system.

SELF-ANGLING

LOC-N-GO SYSTEM

Meyer Path Pro Fits The Biggest Names in the Business.

The Path Pro's universal mounting system will fit any ATV vehicle on the market:

Tough As Nails, Backed With The Best Warranty In the Industry

When you are used to making 800 pound snowplows for full-sized work trucks, you tend to build things that can take a beating. And the Path Pro really shows its DNA.

ROC Solid Warranty

Register online to extend standard 2-year warranty to **5 YEARS** on all structural steel

Stronger By Design

The Meyer Path Pro is stronger at critical stress areas than competitive plows. In the Finite Stress Element Analysis (shown right), red areas indicate areas of weakness or potential failure points. Meyer was able to virtually eliminate these areas without adding any weight to the plow.

No More Broken Winch Cables

Breaking winch cables are no longer a problem with Meyer's unique design that features a rubber grommet that prevents the cable from retracting too far. This feature also notifies the operator when the plow is fully lifted.

EASE-OF-USE

Up, Down, Right, Left... Path Pro Adjusts to Your Needs

The up-down movement of the Path Pro is provided manually or remotely. Sold separately, you can obtain a manual lift kit (*shown left*) that allows the operator easy access to a lift arm that lifts or drops the moldboard. If you prefer, you can also lift or drop the moldboard using an electric winch as recommended by your ATV dealer.

Universal Mounting System... For Any Kind Of ATV

The Path Pro comes with brackets that will allow you to easily and securely attach it to just about any ATV. The brackets are also designed to provide you maximum ground clearance once the plow is attached.

Accessories

Snow Shoes Part #09369

Synthetic Rope Part #08290

Plow Markers Part #09916

Manual Lift Kit Part #13860

Steel Cutting Edge (*standard equipment*)

Part #08297 - 50" Part #08298 - 60" Part #08308 - 72"

Polyurethane Cutting Edge Kit

Part #08303 - 50" Part #08304 - 60" Part #08310 - 72"

Rubber Cutting Edge Kit

Part #08301 - 50" Part #08302 - 60" Part #08309 - 72"

Poly Snow Deflector

Part #13368 - 50" Part #13369 - 60" Part #13418 - 72"

Product Specifications

Part No.	Model	Mounting Type	Blade Type	Moldboard Length	Moldboard Height	Moldboard Gauge	Vertical Ribs	Plow Trip Springs	Cutting Edge	Avg. Width at Full Angle	Angling Rams	Weight Complete
29000	PP 50"	Universal ATV	Path Pro	50"	16.25"-17.5"	14	4	2	1/4" x 5"	43.3"-47.4"	3/4" x 6-1/4" Spring Loaded	138 lbs.
