

Meyer®

Year-Round Performance For Utility Vehicles.

Add a Meyer® Drive Pro™ plow to your utility vehicle and you have the perfect solution for plowing sidewalks, long driveways or any area where a pick-up truck is too large. Our contractor-grade plow features Meyer's easy-to-use 2", Class 3 receiver mount and is available in three moldboard sizes (5', 6' and 6' 8") to suite your application. Available with full hydraulics or self-angling.

Meyer's EZ-Mount receiver hitch allows you to remove or mount the Drive Pro plow in seconds.

Fits the Biggest Names in the Business.

The Drive Pro with the EZ-Mount® receiver hitch will fit on some of the biggest utility names in the business including: John Deere, Bobcat, Kubota, Polaris and more.

EZ-Mount® Receiver Hitch

comes on/off the vehicle in seconds by removing one pin.

Step 1: Insert or remove the pin

Step 2: Position the wheels

Step 3: Connect/disconnect power plug

Step 4: Roll the plow away from vehicle

One-Button Control

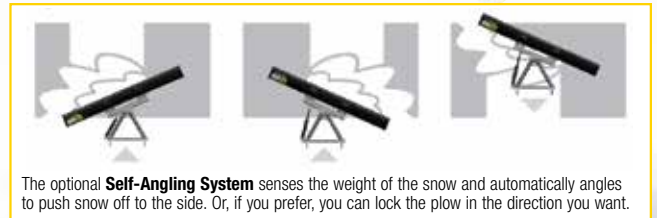

All Drive Pros come standard with an ergonomically-designed pistol grip controller that features intuitive buttons to easily control the functions of the plow.

Available in two options:

- Full power-angling controller allows the plow to go up/down, left/right like a traditional plow.

- Self-angling controller allows the blade to go up/down by pressing a button. Right/left movement is controlled by the weight distribution of the snow on the plow.

The optional **Self-Angling System** senses the weight of the snow and automatically angles to push snow off to the side. Or, if you prefer, you can lock the plow in the direction you want.

Meyer Utility Plow Specifications

Model #	Blade Type	Moldboard Length	Moldboard Height	Moldboard Gauge	Vertical Ribs	Plow Trip Springs	Cutting Edge	Average Width at Full Angle	Angling Rams	Weight Complete
